

How to Activate CCPM+

Having installed CCPM+, you may use the trial version for 10 days. At the last installation step, the software shows a warning:

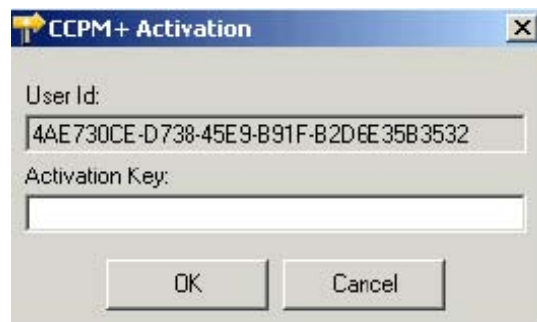

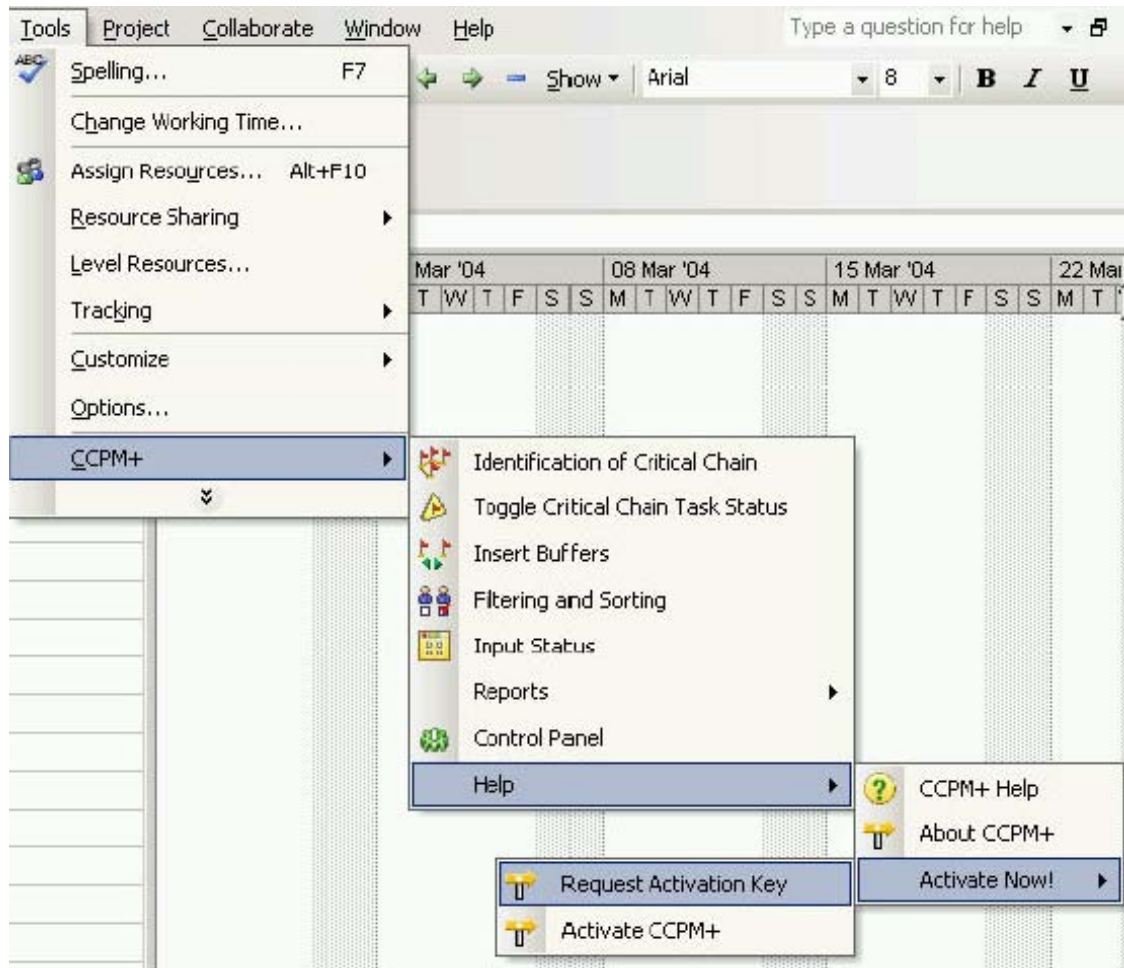

After 10 days, you must activate the product to use it further.

To activate CCPM+:

1. In the Microsoft® Project menu bar, click **Tools**,
2. From the menu, select **CCPM+**,
3. From the CCPM+ submenu, select **Help**,
4. From the **Help** submenu, select **Activate Now!** (If you have already activated the CCPM+ software, the menu does not contain this item),
5. From the **Activate Now!** submenu, select **Request Activation Key**:
6. Then, copy your user ID (highlight in the User Id box and press CTRL-C) and paste into an Email (click in your Email and press CTRL-V) and send it to Larry@advanced-projects.com

Note: Please also use this email address for technical support inquiries.

7. Advanced Projects. Inc. generates your Activation Key (tied to your User ID) and sends it to you. Look for it in your mail box.
8. Repeat items 1 to 4.
9. From the last submenu, select **Activate CCPM**.
10. Copy the Activation key from your email (highlight it and press CTRL-C) and paste into the *Activation Key* field in the **CCPM+ Activation** dialog window (click in Activation key box and type CTRL-V).
11. Click **OK**.

*Note: the CCPM+ uninstaller leaves a record in the system registry preventing any further trial installations. You will **not** need to reactivate when you install upgrades.*
